Executive Director Position

Common Ground High School, Urban Farm & Environmental Education Center is looking for its next Executive Director: A dynamic, proven organizational leader who shares our roots-deep commitment to environmental and food justice, active, authentic learning, and inclusive, equitable community.

About Common Ground

From humble beginnings 20 years ago, Common Ground has grown into a nationally recognized center for environmental learning and leadership in New Haven, Connecticut, dedicated to growing a more just and sustainable community and world. Common Ground is uniquely positioned to do this work. Rooted in the City of New Haven, our 20-acre site includes an urban farm and abuts the 1,500-acre West Rock State Park, sharing hiking trails, wildlife, and diverse natural habitats with the surrounding forests.

Common Ground weaves together three core programs to achieve its mission:

1. Common Ground’s Public Charter High School is the nation’s longest-running environmental charter high school, growing a new, inclusive generation of active learners and powerful leaders.

2. The Environmental Education Center receives more than 12,000 community members each year who participate in festivals, field trips, after-school programs, and other educational opportunities on site. It runs a Schoolyards Program, helping New Haven public schools develop and maintain gardens and bird habitats as educational laboratories.

3. Our Urban Farm is a key resource for the high school and community programs, as well as for the New Haven community. It includes production and education gardens, honeybees, and livestock. The food we grow is served in our school cafeteria, sold at our farmstand and through a mobile market serving low income community members, distributed through a CSA for our high school students, and used in our programs for children and families.

Common Ground has a budget of approximately $5.5 million and employs approximately 50 full-time and 20 part-time staff. Common Ground has a commitment to examining the intersection of social, environmental, and food justice issues; how systems of oppression, including white privilege, impact the organization’s work; how resistance to those systems can position students to lead the change towards a more equitable and sustainable society.
